PTV_6160	6,160	6,160

KPS: 90

SYSTEMIC THERAPY: immunotherapy

SIGNIFICANT TREATMENT BREAK: None

TREATMENT COMPLETION STATUS: As Planned

RESPONSE AT TREATMENT COMPLETION: Pending Imaging

TOLERANCE/NARRATIVE: Berdia M Monson tolerated treatment fairly well. She did have some significant fatigue by the end of treatment. However she reported good appetite and p.o. intake. She is able to maintain her weight. No lower GI symptoms. She reported in fact constipation. She had some LUTS towards the end of treatment with sensation of incomplete emptying and occasional dysuria. She was advised to pick up AZO. We discussed that if any worsening or new symptoms beyond 2 to 3 weeks after completion of treatment to call our office with any questions or concerns. She expressed understanding.

We have reviewed skin care instructions and acute side effect management. We have asked the patient to call if there are any questions or concerns prior to the next appointment.
